DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 47 is rejected under 35 U.S.C. 102(b) as being anticipated by Savord.

Savord discloses in figures 1-3 a method of treating a patient in need comprising collecting morphological data on the patient (via using CPU 2), inputting the data into a medical device and delivering sinusoidal waves (via 34) to the patient using the medical device.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 48-50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Savord.

Savord discloses in figures 1-3 method of treating a patient. However, Savord doesn't disclose the morphological data being x-ray results, caliper measurements or collecting x-ray results following the treatment. It would have been obvious to one

Art Unit: 3772

having ordinary skill in the art at the time that the invention was made that the morphological data could be an x-ray, caliper measurements or an x-ray could be taken after the treatment. The x-ray could be used to shown various injuries to the body, the caliper measurements could be used to take various measurements of the body and the x-ray after the treatment could be used to shown improvements in the body after the treatments are finished.

Allowable Subject Matter

Claims 33-46 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hughes, Kirikorian and Popov discloses a method of treating a patient.
